GENERAL INFORMATION

It is imperative that each Customer Service Manager and/or Officer in Charge carefully check this Timetable regarding timing of trains, crossing arrangements, etc., insofar as his own station or stations he supervises are concerned. He/she will be held responsible for promptly bringing under the notice of the Network Planning – M>Train of any inaccuracies that may appear.

WALLSHEET TIMETABLES issued in conjunction with this book are to be posted in a prominent position at a height from the ground and in close proximity of a light, to enable passengers to consult with facility. A red line must be ruled on each timetable under the name of the station concerned and times applying to it.

SUBURBAN PASSENGERS TRAVELLING BY Non electric services Suburban inter-station travel by **Non electric services** including locomotive-hauled passenger trains, Sprinters, and Railcars is permitted only where stopping conditions permit.

LATE RUNNING OF TRAINS IN THE M>TRAIN NETWORK

At all originating and terminating points in the M>Train Network, the early/late arrival or departure of all trains must be promptly reported to Metrol. This is to enable advice to be given to other locations and so corrective actions can be taken to regain "on time" running. **All late arrivals at outstations must be accurately documented and data passed on to METROL as per OPR requirement.**

As well, stations and signal boxes listed below are to promptly report late running of three **(3) or more minutes** of all trains to the appropriate Train Controller at Metrol.

| Caulfield Box | Coburg |
| Oakleigh * | Kensington Box |
| Springvale Box | Essendon |
| Dandenong Box | Footscray |
| Pakenham | Newport Box |
| Cheitenham | Sunshine Box |
| Mordialloc * | Sydenham |

* When the signal box is switched out, station staff are responsible to forward the information to Metrol.

GENERAL INFORMATION (Cont.)

TIMING OF TRAINS

Times shown thus **13 34** - indicate the times trains are due to arrive and/or depart from the various stations, junctions, etc. **Where no timing is shown trains do not stop.** Where no 'arr' or 'dep' is shown next to a location name it is to be treated as though the previous 'arr' or 'dep' applies. Accompanying symbols with the timings may modify the conditions of the stop, e.g. **13 34u**, **13 34d**, etc.

Timings accompanied by an asterisk (*) thus **13 34*** indicate the time the train is due to pass through stations, junctions, etc., without stopping.

NUMBERING OF TRAINS

Electric multiple unit trains (designated Elec. in train column). Loco. hauled passenger and goods trains, Sprinters and Light Locomotives are indicated by **Train Describer Numbers** in large type at the head of the column, thus **4306** even numbers for up trains and odd numbers for down trains.
